Clone distribution: MGC clone distribution information can be found through the I.M.A.G.E. Consortium/LLNL at: http://image.llnl.gov Series: IRAL Plate: 21 Row: K Column: 20 This clone was selected for full length sequencing because it passed the following selection criteria: Hexamer frequency ORF analysis, Similarity but not identity to protein.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    /translation="MAVLSAPGLRGFRILGLRSSVGLAVQARGVHQSVATDGPSSTQP

On Dec 13, 1999 this sequence version replaced gi:6449494.

For further information about this sequence, including its location and relationship to other sequences, please visit our sequence archive Web site (http://www.fruitfly.org/sequence), or send email to bdop@fruitfly.berkeley.edu. All contigs in this submission meet the following cutoffs: length >= 200 bases.

* NOTE: This is a "working draft' sequence it currently consists of 77 contigs. The true order of the pleces

* arbitrary. Gaps between the contigs are represented as runs of N. but the exact sizes of the gaps are unknown.

* This record will be updated with the finished sequence

* as soon as it is available and the accession number will

* be preserved.

```
and relationship to other sequences, please visit our sequence archive Web site (http://www.fruifily.org/sequence/) or send email to bdgp@fruifily.berkeley.edu. All contigs in this submission meet the following cutoffs: length >= 200 bases.

* NOTE: This is a 'working draft' sequence. It currently consigns. The true order of the pleces is not known and their order in this sequence record is arbitrary. Gaps between the contigs are represented as "runs of N, but the exact sizes of the gaps are unknown.

* This record will be updated with the finished sequence as soon as it is available and the accession number will be preserved.

Direct Submission

Submitted (28-JUL-1998) Joint Genome Institute, Lawrence Livermore National Laboratory, 7000 East Ave., Livermore, CA 94551, USA Map and sequence oriented from p telomere to centromere. Cosmid R34382 is adjacent to cosmid R28991 to the left, and overlaps BAC 38864 to the right from bases 33,973 to 34,873. Estimated sequence gap between R34382 and R28991 is <1 kb. Additional map and sequence information may be obtained at: Location/Qualifiers

* consists of 20 contigs. The true order of the pieces
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              is not known and their order in this sequence record is arbitrary. Gaps between the contigs are represented as runs of N, but the exact sizes of the gaps are unknown. This record will be updated with the finished sequence as soon as it is available and the accession number will be preserved.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            contig of 1157 bp in length
gap of unknown length
contig of 1051 bp in length
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                contig of 14839 bp in length

arbitrary. Low-pass sequence sampling is useful for identifying clones that may be gene-rich and allows overlap relationships among clones to be deduced. However, it should not be assumed that this clone will be sequenced to completion. In the event that the record is updated, the accession number will
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   11427 115278: cont.19 of 712 bp in length 11527 12238: cont.19 of 712 bp in length 12239 12339: gap of 100 bp 12339 13050: gap of 100 bp 13051 13150: gap of 100 bp 13051 13150: gap of 100 bp 13069 13069: cont.19 of 718 bp in length 13069 13069: cont.19 of 718 bp in length 14700 14799: gap of 100 bp 15513 15612: gap of 100 bp 15513 15612: gap of 100 bp 15513 15612: gap of 100 bp 16337 16436: gap of 100 bp 16337 16436: gap of 100 bp 17381 17281: gap of 100 bp 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 17381 173

It currently consists of 19 contigs. The true order of the places is not known and their order in this sequence record is arbitrary. Gaps between the contigs are represented as runs of N, but the exact sizes of the gaps are unknown. This record will be updated with the finished sequence as soon as it is available and the accession number will
                                                                                                                                                                                                                                                                                                                                                                 Center clone name: 24_614

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Description
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       BE733056
